Providing a well-structured example helps students see how to organize their thoughts. Below is a sample of a third grade expository paragraph on the topic "The Life Cycle of a Butterfly," which exemplifies the features discussed above.

Introduction

Butterflies go through four main stages in their life cycle. These stages are egg, caterpillar, pupa, and adult butterfly. Each stage is different and important for the butterfly to grow and change.

Body Paragraphs

-

Egg Stage

It all begins when a female butterfly lays eggs on a leaf. The eggs are tiny and round. After a few days, the eggs hatch into caterpillars.

-

Caterpillar Stage

When the eggs hatch, a caterpillar, also called a larva, comes out. The caterpillar eats leaves and grows bigger. It molts, or sheds its skin, several times as it gets bigger.

-

Pupa Stage

Next, the caterpillar forms a chrysalis, also known as a pupa. Inside the chrysalis, the caterpillar changes into a butterfly. This stage can last from a few days to a few weeks.

-

Adult Butterfly

Finally, the butterfly emerges from the chrysalis. It waits a little while for its wings to dry and then

flies away. The butterfly will later lay eggs, and the cycle begins again.

Conclusion

The life cycle of a butterfly is fascinating because it shows how a small egg can grow into a beautiful flying insect. Each stage is important, and all of them help the butterfly survive and reproduce.
